

ER-200A:
2-Port Coaxial Ethernet Repeater

Key Features

- 2 port coaxial repeater
- Complies with IEEE 802.3 Ethernet standard at 10Mbps transfer rate
- Provides 2 types of connections: Thin Ethernet for BNC port Thick Ethernet for AUI port
- Selection of Thin or Thick Ethernet cable media on each port
- 2 diagnostic LEDs available for each port
- Auto-partition
- Auto-reconnection
- Automatic traffic detection
- Automatic data packet fragment extension
- Automatic preamble regeneration

Overview

The ER-200A is a 2-port Ethernet coaxial repeater. With 2 BNC and 2 AUI connectors on-board, ER-200A can be configured to connect up to 2 Ethernet Thin or Thick line segments by jumper settings on each port. With the appropriate external transceivers, ER-200A can also be connected to 10Base-T or Fiber Optic network as well. 2 LEDs are available for each port to monitor line activity and troubleshooting.
